

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

## A warm welcome word from the department's chairman

*Dear beloved students,*

**First of all**, with my heartfelt happiness; I would like to warmly welcome you to this amazing department. Basically, I can assure every single one of you that you are here because you deserve to be. Anatomy and Embryology department is one of the most leading departments in teaching Gross and Topographical Anatomy, Neuroanatomy, Embryology and Cell Biology to undergraduate and postgraduate Medical, Dental, Pharmaceutical, and Nursery students. That can be achieved by Using various resources; e.g. skeleton, models, plastinated specimens, CDs, posters, etc. In addition, our supervisors and tutors are at the leading edge of their fields. Furthermore, our department has got an outstanding staff, extraordinary community, healthy environment, and great facilities. Therefore, at our department you will feel home.

**Secondly**, regarding Anatomy, it is a very easy subject to learn. That is simply because most of you are already aware of what your body is made up from. You only need to go a little bit in-depth and know more about how structures of your body look like. In addition, you need to add to your knowledge some information about how these structures function.

**Thirdly**, our department's policy is to treat all students equally irrespective of their ethnic origin, race, sex, religion, or political belief.

**Fourthly**, I would like to offer you some precious tips for how to make the best of your experience not only at Anatomy department, but also on a larger scale, at other departments. Share knowledge and ideas with your colleges, challenge yourself and your colleges, find a partner with a similar learning style and quiz one another on a daily basis, study a little each and every day, Exercise your tongue, “practice, practice, practice” and above all, have fun 😊.

**Lastly**, I would like to take this opportunity to express my deep gratitude and sincere thanks to Dr Islam Salama for his immense support ~ without him, this work couldn't have been done ~

I wish you all the best of luck!

Kind regards,

**Prof Dr Mohamed A. Autifi**

Professor and chairman of the department
